**“This is what the Lord says—your Redeemer, who formed you in the womb: I am the Lord, the Maker of all things, who stretches out the heavens, who spreads out the earth by myself...”Isaiah 44:24**

The world we live in has almost 8 billion people. And we are only one of the less populous of the more than 11 million estimated living species on earth. Our world, one of eight planets that revolve around the sun, is just a small part of the universe. The sun belongs to a galaxy called the Milky Way with an estimated 100 thousand million stars. And there are millions upon millions of other galaxies. It is hard to comprehend!

Isn't it amazing therefore that our loving creator knows the exact number of His creation, including you and me and the smallest insect and anything else that might be out there! How comforting that He cares and has a unique purpose for all.

## **A small but important part of the Infinite**
